Panel Discussion on Energy & Environment

- » Wednesday, June 16 13:30-15:30
- » Lecture Hall

The 2010 Goldschmidt Conference will host a panel discussion focused on defining the important issues and key challenges relevant to the conference theme 'Earth, Energy, and Environment'.

The panel will explore how geochemistry can contribute to science policy decisions and in turn how governmental and regulatory policies might drive how we conduct the science. An important outcome of the panel discussion will be defining a path forward that promotes better communication between the science community and policy makers.

Panelists include: **Sally Benson**, Director of the Global Climate and Energy Project at Stanford University; **Linda Gundersen**, Acting Associate Director for Geology at the U. S. Geological Survey; **Adam J. Rondinone**, Legislative Fellow in Senator Lamar Alexander's (TN) office; **Sherri Stuewer**, Vice President for Environmental Policy and Planning at ExxonMobil.

The discussion will be moderated by Sam Mukasa, President of the Geochemical Society.

Town Hall Meeting

- » Tuesday, June 15 18:30-20:30
- » Ballroom A

An NSF-hosted Town Hall meeting for the Geobiology and Low-Temperature Geochemistry community will be held at Goldschmidt 2010 to discuss common research themes, the near and longer term future for this relatively new field, and a strategy for gaining more impact in earth, space, and ecosystem science.

EAG General Assembly

- » Tuesday, June 15 12:30
- » Rotunda Room

All EAG members are welcome. The General Assembly is the annual members' meeting, and it is an opportunity for members to be kept up to date with the EAG's activities, and to discuss related matters.
